Summary

Computer Science (AIML) undergraduate with hands-on experience in Python, C++, machine learning, and full-stack development. Proficient in building scalable applications, developing ML models, and deploying end-to-end systems using REST APIs. Strong foundation in data structures, algorithms, and problem-solving.

Education

Noida Institute of Engineering & Technology, Greater Noida 2023–2027
B.Tech in Computer Science and Engineering (AIML) — CGPA: 8.89

Hansraj Smarak Sr. Sec. School, Delhi

Intermediate (XII): 74.8% 2023

High School (X): 91.5% 2021

Experience

Python & Machine Learning Intern May 2025 – June 2025
CodSoft

- Engineered a Python-based random password generator with configurable constraints using secure randomization and optimized string manipulation techniques.
- Developed supervised machine learning models for credit card fraud detection and customer churn prediction, applying feature engineering and model evaluation techniques.
- Implemented an NLP-based spam SMS classification system using text vectorization (TF-IDF) and classification algorithms to accurately distinguish spam and legitimate messages.

Projects

AI-Powered Mental Health Chatbot and Tracking System Jan 2026 – Mar 2026
React, TypeScript, Flask, Python, NLP, Gemini API

- Built a full-stack mental health tracking platform enabling users to log moods and visualize emotional trends via interactive dashboards.
- Integrated an NLP-based chatbot using Gemini API to generate context-aware responses for user interaction.
- Designed backend APIs using Flask for real-time data handling and seamless frontend-backend integration.

Real-Time Public Transport Tracking System Sep 2025 – Dec 2025
Django, GPS Tracking, REST APIs

- Developed a real-time vehicle tracking system providing continuous GPS-based location updates.
- Implemented REST APIs for efficient data communication between client and server.
- Improved tracking reliability by applying route prediction algorithms under low-bandwidth conditions.

Certifications

- NPTEL Elite: Introduction to Programming in C, Operating Systems Fundamentals
- Infosys Springboard: React JS, Object-Oriented Programming using Python
- Cisco Networking Academy: Cybersecurity Essentials, Network Essentials

Skills

Programming: Python, C, C++, JavaScript

Frameworks & Tools: Django, React, Node.js, REST APIs, Git, GitHub

Databases: MySQL, MongoDB, SQLite, Firebase

Core Concepts: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Machine Learning

Achievements

- Smart India Hackathon (SIH) 2025 Finalist — National-level software innovation challenge
- Solved 120+ problems on LeetCode, strengthening data structures and algorithmic problem-solving skills
